

DESTINI Estimator | next generation estimating solution

all access dashboard

A spreadsheet like dashboard allows users to access all of their data inside this environment. Users can create reports from within the dashboard instead of utilizing Excel and compare historic costs directly from the estimate.

Full-fledged reporting engine allowing users to create content rich reports capable of pulling and formatting any data from the estimate.

| Item Description | Quantity | Unit | Rate | Amount |
|---|-----------|--------|---------|---------------------|
| 313100 Soil Treatment | 40,950.00 | S.F. | \$0.20 | \$8,190.00 |
| 0020 Turf Pre-Treatment at Building Site | | | | \$0.00 |
| Total - 313100 Soil Treatment | | | | \$8,190.00 |
| 313200 Soil Stabilization | | | | |
| 0014 Moisture Condition in Building Fill - via Removal / Replace (Define Depth) | 4,333.33 | C.Y. | \$7.50 | \$32,500.00 |
| 0016 Over-Excavate for Moisture Conditioning (Define Depth) | 5,777.78 | C.Y. | \$3.50 | \$20,222.22 |
| Total - 313200 Soil Stabilization | | | | \$52,722.22 |
| 316000 Special Foundations and Load-Bearing Elements | | | | |
| 0027 Detail Per Turnkey, 36" Diameter - Includes Soil Nail off | 3,250.00 | V.L.F. | \$87.00 | \$282,750.00 |
| Total - 316000 Special Foundations and Load-Bearing Elements | | | | \$282,750.00 |
| Total - 31 Earthwork | | | | \$414,115.00 |
| 32 Exterior Improvements | | | | |
| 321100 Base Courses | | | | |
| 0022 Underlaid Drainage Course, For Building Pad, Crushed Stone, 8" Deep | 1,644.00 | C.Y. | \$16.00 | \$26,304.00 |
| Total - 321100 Base Courses | | | | \$26,304.00 |

custom reporting

Benefits of Estimator

DESTINI Estimator is a stand alone estimating platform giving the estimating team greater customization and detail based on project and/or client. Notable benefits to the project team include:

- Eliminates Maintenance of Multiple Databases
- Project Information Manages Design
- Estimate Based on Design Team
- Consistent Brand and Deliverables
- Seamless Integration
- Basis of Integrated Project Delivery
- Unlimited Amount of WBS Properties

Estimator, part of the DESTINI suite of products, was developed for a real world application that helps solve complex issues within construction estimating. It is simple and lightweight while also integrating with other systems.

DESTINI Estimator minimizes the number of steps in the estimating process and creates a better project outcome. This next generation estimating solution allows the user to have one cost estimate database from planning through buyout so the information is consistent and knowledge transfer is seamless.

DESTINI Estimator allows the project estimate to be more than just a set of costs and fees. It allows the estimate's line items to have embedded intelligence that come directly from the building model they were born from. This allows better scope for the team as well as communicate intent and context to the owner.

filter flexibility

Filters allow users to quickly find line items as well as develop customized views based on specific users, projects and/or clients.
